## 10 Advantages of 3CX Phone System

1. Easy to manage by an IT administrator
2. Costs less to buy and expand
3. Greater return on investment
4. Use existing hardware and make huge savings
5. More features by leveraging Windows technologies
6. Hardware & vendor independent – no vendor lock in
7. Better fault tolerance through easy backup of your PBX
8. 3CX Phone System is more scalable than hardware PBXs
9. Better integration with other business applications
10. Easily build voice applications that increase productivity

## PRODUCTIVITY AND MOBILITY WITH 3CX PHONE SYSTEM FOR WINDOWS

Move to 3CX Phone System - an open standard Windows-based IP PBX that provides superior features, flexibility, Unified Communications and unparalleled mobility at a far lower cost.

- Lower call costs and globalize your business by making use of worldwide VoIP providers and bridging your offices for free inter-office calls.
- Increase mobility by allowing employees to take their extension with them wherever they go.
- Improve productivity with superior Unified Communications features, providing office-wide presence, setting up conference calls and desktop call control.
- Eliminate expensive telecom consultants with an easy to use web-based PBX console.

3CX Phone System completely replaces a hardware PBX without the need for additional phone wiring. It supports popular SIP phones, VoIP providers and traditional PSTN lines. The 3CX Phone System web-based management console makes it easy to configure, eliminating the need for expensive maintenance.

## How It Works

3CX Phone System runs on a Windows machine and connects to any SIP soft or hardware phones and iPhones or Android smartphones as extensions. External lines are connected using VoIP Gateways (keep your PSTN lines) or with a VoIP provider.

## 3CX Makes Call Management a Breeze

3CX rids the PBX from the office and desktop environments, delivering Unified Communications features such as conferencing, seeing the presence of your colleagues, corporate instant messaging, setting your status and more. Users can avoid using a cryptic phone interface by managing their extension and their calls with just a few mouse clicks on Windows or directly from their iPhone or Android device.

## Extensive Enterprise Level Feature Set

While traditional PBXs require additional hardware modules and maintenance to add new features such as auto-attendant and call queuing, they all come standard with 3CX Phone System. Additionally, 3CX Phone System integrates with popular CRMs such as SalesForce, Microsoft Dynamics and Sage ACT!

## Unparalleled Mobility – Take Your Extension Anywhere

3CX is unique in its integration of PUSH Technology which means that 3CX can 'wake up' the phone when a new VoIP call comes in! Now Android and iPhone smartphones wake up when a call or chat message arrives, saving valuable battery time whilst still allowing you to be reachable on your extension anywhere and slashes company call costs as users can be reached via VoIP.

TOSHIBA

## Editions and Licensing

3CX Phone System is available in several editions based on the number of simultaneous calls (internal & external) your company makes. Upgrades are activated instantly with a license key - there's no need to reinstall 3CX Phone System. A detailed feature comparison table can be found at [www.3cx.com/phone-system/edition-comparison](http://www.3cx.com/phone-system/edition-comparison).
